SOFTWARE ENGINEER

Highly motivated and detail-oriented Software Engineer with a robust foundation in web and mobile application development. Proficient in front-end technologies including HTML, CSS, JavaScript, and React, with practical experience in building responsive and user-centric applications. Eager to leverage technical skills and creativity to contribute to innovative software development projects and continuously learn new technologies and methodologies.

SKILLS

- Programming Languages: HTML, CSS, JavaScript
- Front-end Frameworks: React, Bootstrap
- Back-end Technologies: Node.js, PHP
- Database Management: MongoDB, MySQL
- Mobile Development: Flutter
- Cloud Services: Firebase
- Version Control: Git (GitHub Actions)
- Tools: Visual Studio, VS Code, Figma, Postman
- Project Management: Trello, Agile (SDLC)
- Other: Web Performance Optimization, Cross-browser Compatibility

PROJECTS

School Management System

Technologies: *React, Node.js, CSS, GitHub, Trello*

- Developed a comprehensive school management system for a private company, significantly streamlining administrative tasks and enhancing communication efficiency.
- Managed project workflow and collaboration using GitHub and Trello, ensuring timely delivery.

E-commerce Website

Technologies: HTML, CSS, JavaScript, PHP.

- Designed and implemented a functional e-commerce website, demonstrating proficiency in front-end and back-end development.
- Organized and prioritized tasks to ensure efficient project completion.
- Collaborated independently to effectively resolve technical challenges.

School-Centric Budget Tracker Website (Group Final Project)

Technologies: React, Node.js, MongoDB

- Played a pivotal role in the design and participated in all development phases for a budget tracking web application.
- Contributed to the full-stack development, integrating React for the front-end, Node.js for the back-end, and MongoDB for database management.

Personal Budget Tracker Web App

Technologies: React, Node.js

- Developed a user-friendly personal budget tracker web application, focusing on intuitive user experience and robust functionality.

Mobile App (Companion to Budget Tracker)

Technologies: Flutter

- Created a companion mobile application using Flutter, extending the functionality and accessibility of the budget tracker.

Education
Bachelor of science in Software Engineering
Wachemo University, Hossana, Ethiopia, June 21, 2025
